The Challenge of Technology @ Home

- Monitor and guide children through their use of technology.

- Even when children seem to have good technical knowledge, their online behaviour still requires parental monitoring and guidance.

- Spend time online with your child – exploring what they get up to can be fun!

- Keep technology in a shared and visible place.

- Set rules, and do your best to stick to them!

- Discuss amount of time they can spend on technology

- Negotiate & persevere

- Keep a balance of ALL types of activities – social, physical, intellectual.

- Encourage reporting, and engage in conversation about usage.

- Not all screen time is the same!

    - Co-engagement (working together with technology)

    - Learning content & context (is the task facilitating learning and thinking?)

- Seek advice and use your supportive network – other parents, teachers & online.

... Learning for life
